## The value of HI GIO S3 Storage brings to businesses

### SUPER FAST

. Move large data blocks quickly, high-speed reaching 100MB/s.
. FPT Telecom network connection - transmission bandwidth is always stable, fastest, and most consistent.
. Flexible integration into customers' Backup system via S3 protocol.

### SECURITY - SAFE

. Data on servers located at FPT Data Center meeting international standards (Hanoi, Ho Chi Minh).
. The system is built on Cluster Multi-node and HA technology.
. Preserve data using Object Lock, Versioning.
. TLS/SSL transmission data encryption + SSE data encryption.

### SAVE COST

. Optimize 30 - 50% of operating costs and system investment compared to other CSPs.
. Quickly expand storage space.
. Optimize usage time when flexibly connecting to customer systems via the S3 protocol.

### JAPANESE SERVICE

. 24/7/365 support from a team of leading telecommunications experts, both domestic and nternational.
. English - Vietnamese – Japanese.

---

**FPT Telecom** is one of the Vietnam's most comprehensive and broadly adopted Cloud and IT services We, offering a full spectrum of services nationwide.

**IIJ Global Solutions Vietnam** is a subsidiary of IIJ Group, which has been leading as a pioneer in the field of enterprise networks, infrastructure, and cloud solutions around the globe since its establishment in 1992. Established in 2016, with the mission of enhancing business productivity and flexibility to go one step further, we provide turn-key cloud & security solutions, and IT consulting & system integration service in Vietnam.

**HI GIO CLOUD** is the very first full-scale public cloud service in Vietnam, and the unique product of a powerful collaboration between two leading technology companies, FPT Telecom and Internet Initiative Japan (IIJ). We create an unique product designed specifically for Vietnamese market based on advanced Japanese technology combined with FPT's international standard Data Centers system.
